

Oracle Business Accelerator

There's no reason why fast-growing businesses or government entities with limited resources shouldn't have the same capabilities as larger enterprises. Oracle Accelerate gives growing businesses easy-to-own, industry-specific solutions at an affordable price and delivers simply priced bundles of applications and rapid implementation tools to minimize start-up time and risk.

Using a fixed-scope approach, Oracle Accelerate substantially reduces the risk and complexity of more traditional, large-scale implementations. Now you can have the right applications to manage your operations and data, implemented rapidly so you can achieve real business value quickly. Shorter implementation time also means lower cost and less business disruption.

Fact: 190,000 midsize companies use Oracle; of these over 25,000 use Oracle Applications to run their business; you don't need to be a large company to take advantage of Oracle's leading-edge business applications and technology.

Imagine the Possibilities: If you are interested in a rapid, low-risk approach, look no further. Dataweave's Oracle Accelerate solution is packaged and delivered to be easy to implement, industry-focused, and comprehensive: just what you need and nothing you don't, so you can start at just the right size-and price-for your needs.

Optimised for your Industry: Oracle Business Accelerators deliver world-class functionality to answer the challenges facing manufacturers and service industries. Industries are facing intense global competition and striving to keep their supply chain costs low while maintaining regulatory compliance and customer satisfaction. Excellence in supply chain execution holds the key to be a leader in the industry. Growing organizations must innovate to manage escalating costs, drive efficient project and services management and retain control and governance. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

The Oracle Business Accelerator achieves this through providing access to the power and functionality of the entire E-Business Suite but providing automated configuration tools based on the most common industries and business flows.

Oracle E-Business Suite is the world's leading integrated business solution platform. No other vendor can offer the broad functionality covering Financials, HR, Procurement, Projects, Supply Chain and Manufacturing as well as providing the world's leading database and middleware platform.

Infrastructure: Dataweave can implement on your site or provide a single-tenant or multi-tenant hosted solution (Software as a Service / SaaS). We work with leading infrastructure partners to ensure that you have the right hardware solution for your needs taking into account your skills, current and planned usage and availability requirements.

Implementation: The Oracle Business Accelerator (OBA) toolset allows Dataweave to deliver complete solutions in record timeframes. Based on Oracle best practice business flows, the tools automates the software configuration process reducing implementation time and cost. The powerful and unique part of this offering however is that there is no restriction on the functionality in using the automated tool; additional functionality and modules can be set up after the initial configuration at any time to support your business as it grows and requirements change.

Applications Integration: Dataweave has proven experience integrating applications using the latest SOA (Service Orientated Architecture) techniques. Employing Oracle's leading SOA products we can automate manual business processes and integrate your systems to increase productivity and reduce errors from manual interfaces and double entry.

About Dataweave

Dataweave is a specialist Oracle consultancy and solutions provider. Founded by ex-Oracle managers and seasoned consultants, we have achieved Certified Advantage Partner accreditation - the highest level of qualification in the Oracle Partner program. In addition to our CAP status we are one of a limited number of selected partners that Oracle has trained and certified in the use of the OBA rapid implementation toolset. We have proven success with this new approach. We also provide Oracle consultancy, systems integration, database managed services and applications support to organisations throughout Australia and New Zealand.

For more information on Oracle for midsize companies visit <http://www.dataweave.com.au/midsize> and midsize.oracle.com or call us on 02 8920 3933 or 03 9013 0806.

"We searched the world to find an integrated solution that can handle all facets of our operations from HR to Projects to Financials – only Oracle E-Business Suite is up to this challenge."
