

SERVICES INDUSTRY SOLUTIONS

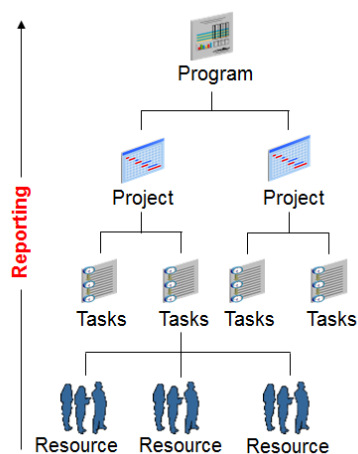

Improving Profitability and Cash Flow with Better Project Visibility and Control

Service organisations have particular requirements: Revenue and Costs are driven by time and labour. Work is often Project or Contract based. Tracking labour and contract costs and the integration of Project Management with invoicing and accounts is critical to running a Services company effectively.

Easy-to-use business systems with informative dashboards and powerful drill-down capabilities improve management productivity giving a rapid Return on Investment. Comprehensive document management and web content management can improve the quality and manageability of both internal information and customer deliverables.

Dataweave's solution for services industry organisations is based on an in-depth knowledge of the processes that drive your business. So you can make better, more informed strategic decisions in the areas most important to you - whether you want to gain greater visibility across your enterprise, get closer to your customers, or reduce inefficiencies.

Dataweave has developed a total solution for Professional Services and Consulting organisations. Based on Oracle's E-Business Suite, together with Dataweave's rapid implementation templates, we can deliver a fully working Project and Financial Management solution for services-led organisations within 3 months. This rapid timescale not only reduces business disruption but also means a significantly reduced cost.

With Dataweave's solution for Professional Services you can rapidly gain the benefits from a Tier One solution that is affordable by mid-sized organisations. The solution can be provided on your premises or as a managed service in the cloud – the choice is yours.

A payment plan including licences, support and implementation services can be tailored to meet your CAPEX and OPEX goals.

SERVICES INDUSTRY SOLUTIONS

An optimised solution to meet your business needs can be configured from the core components below.

Financial Management

Oracle Financials incorporates powerful General Ledger, Accounts Payable, Accounts Receivable, Fixed Assets and Cash Management. A full suite of purchasing modules helps to manage the procurement function. Self Service modules are available for online access by customers (iReceivables), suppliers (iSupplier) and employees (iProcurement and iExpenses).

Project Management

Oracle's Projects Suite includes modules for Project Management, Project Costing, Project Billing, Project Resource Management and Project Contracts. It includes full two-way integration with Microsoft Project to allow Project Managers to continue to use the tools they are familiar with. Oracle Projects Suite gives you visibility and control over your project revenue and costs from incurring the expense through to billing your customer.

Resource Management

Oracle has a full Human resources Suite from timecard data collection, through Project Resource Management and Human Capital Management to Payroll. Self Service HR gives the employees the ability to manage their own details and entitlements. Oracle Talent Management helps you manage succession planning and staff retention.

Document Management

Consulting companies need effective document management. Oracle's Universal Document Management product provides powerful search and secure storage capabilities. The WebCenter Imaging module includes Accounts Payable workflows for automatic matching of received invoices to purchase orders to dramatically reduce the effort and time taken in AP processing.
